Icynene Insulation
5805 Whitte Rd., Unit #110
Mississauga, Ontario
Canada L4Z2J1

Re: Icynene Insulation System

As discussed, the Elk family of roofing products is currently approved for use with spray-in-place Icynene Insulation System, according to the following:

1. All structural roof work including decking/sheathing is in place and in compliance with local codes.
2. The Icynene Insulation System is applied to the underside of the roof decking/sheathing and complies with local codes.
3. Apply Elk starter strip, Elk hip and ridge shingles, and Elk field shingles in accordance with the recommendations printed on each bundle wrapper. Elk hip and ridge shingles will carry the limited warranty period applicable to the Elk field shingles. Our product specifications, directions for application, and limited warranties are enclosed for further information.
4. The Elk Corporation will not be responsible for any deficiencies or movement of the roof deck, manufacturing defects in the fasteners resulting in their failure to perform, and/or improper application of the Elk shingles.

Thank you for your interest in Elk products. Please give me a call at *toll free 866-355-8324, #3*, if you need any further assistance.

Very truly yours,
